 <https://www.linkedin.com/in/mazen-sabry-bah/> |  <https://github.com/mazensabry2712>

SUMMARY

PHP/Laravel Backend Engineer with expertise in MVC architecture, REST API development, JWT/Sanctum authentication, SQL/NoSQL databases, CI/CD pipelines, Git/GitHub workflows, Agile methodologies, and CMS/ERP/CRM integrations-ready and honored to join your team.

PROFESSIONAL EXPERIENCE

Midlevel Backend Developer | Ektm (Jan 2024 - May 2025)

- Led the development and maintenance of core backend applications using Laravel and PHP.
- Designed and implemented secure REST APIs using JWT/Sanctum for integration with JavaScript and React frontends.
- Worked on diverse projects including Content Management Systems (CMS), e-commerce platforms, and booking systems.
- Optimized database performance (MySQL) and ensured fast API response times.
- Managed deployments and configured CI/CD pipelines to ensure rapid and stable updates.

Junior Backend Developer | The X Net System (Jun 2023 - Sep 2024)

- Contributed to the development of web applications using the Laravel framework.
- Assisted in writing and testing APIs and managing SQL databases.
- Worked within a team environment using Git/GitHub for version control and project collaboration.
- Provided technical support, maintained existing codebases, and performed bug fixes.
- Interfaced with Blade templates and HTML/CSS for backend-frontend integration.

PROJECTS

BackEnd Laravel Developer | Ektm (2024-2025)

QR Code Generator Project (<https://qrcode.ektm.cloud/en/>):

- Implemented a Laravel MVC backend and JavaScript frontend to generate static and dynamic QR codes/barcodes—complete with scan analytics, geo/device retargeting, scheduling & expiration rules, password protection, URL shortening, and CI/CD-enabled deployments.

Food delivery and shopping (<https://food-delivery.ektm.cloud/>):

- Developed a Laravel MVC backend and JavaScript interface for a restaurant food-delivery platform—featuring dynamic menu browsing, cart management, JWT/Sanctum-secured REST APIs, MySQL persistence, Git/GitHub versioning, and CI/CD pipelines.

Booking (<https://demo.ektm.com/4/>):

- Built a Laravel MVC backend with JavaScript for a multi-city hotel booking platform—featuring dynamic search by destination and dates, weekly promotional deals, and user/owner authentication, leveraging SQL persistence, Git/GitHub version control, and CI/CD pipelines.

Koralive (<https://koralive.ektm.cloud/>):

- Developed a Laravel MVC backend and JavaScript-driven global football news & live-score platform with dynamic multi-timezone match schedules, real-time news feed, MySQL persistence, Git/GitHub version control, and CI/CD pipelines.

BackEnd Laravel Developer | FreeLancing (2022-2025)

MDSJEDPR (<https://www.mdsjedpr.com/> :)

- Developed a comprehensive ERP (Enterprise Resource Planning) system for a Saudi-Jordanian company using the Laravel framework.

Elmullim (<https://elmullim.com/>):

- Courses platform is made with laravel, restapi, react, tailwind.

dxit (<https://dxit-lime.vercel.app/>):

- Developed a Smart Store using Laravel (REST API) and a React frontend.

Lormansrl (<https://lormansrl.it/>):

- Developed and customized an e-commerce platform using PrestaShop.

Manolidisgr (<https://www.manolidisgr.com/>):

- Developed and customized an e-commerce platform using PrestaShop and PHP.

Multi Vendor Store (GitHub link):

- Marketplace is made with inertia, filament, react, tailwind.

Dolibarr ERP (<https://www.dolibarr.org/>):

- Developed custom modules for the Dolibarr ERP platform.

Blood Bank Application (GitHub link):

- Developed the backend using Laravel, REST API, and a Flutter frontend.

QUE(attendance-program-by-fingerprint-face-and-finger) (GitHub link):

- made with laravel, restapi, flutter.

SKILLS

- Core Backend: Laravel , PHP , Rest-Api , MVC , SQL , NoSql
- Frontend & Fullstack: JavaScript , React , inertia , Html/Css , Tailwind , Bootstrap
- Authentication & Tools: JWT , Sanctum , Filament
- DevOps & Workflow: Git/GitHub , CI/CD , Agile
- Systems: ERP/CRM , CMS's (Wordpress/jomla/...)

EDUCATION

Bachelor of Information Technology

2022 - 2026

Computer Science University

- Bachelor of Computer Science (Information Technology) SADAT UNIVERSITY

WORKFLOW

- Define project requirements and design the MVC structure and database.
- Set up the Laravel project and configure the development environment and Git.
- Develop the code and secure the API with unit and API tests.
- Enable CI/CD, deploy the application, and monitor performance and maintenance.
